PROFESSIONAL SUMMARY

Final-year Artificial Intelligence and Data Science student at Francis Xavier Engineering College, Tirunelveli, with a strong interest in Artificial Intelligence, Machine Learning, Computer Vision, and intelligent automation. Experienced in developing practical projects involving AI-powered virtual assistants, voice-enabled chatbots, and facial recognition-based attendance systems.

A strong problem solver and logical thinker with the ability to analyze challenges, develop structured solutions, and learn new technologies quickly. Interested in applying AI and software development skills to real-world problems while continuously developing technical and analytical capabilities.

EDUCATION

Bachelor of Technology in AI & Data Science

Francis Xavier Engineering College,
Tirunelveli
Graduation: 2027

Relevant coursework includes Machine Learning and Data Visualization.

EXPERIENCE & PROJECTS

INTERNSHIP:

ICONIX SOFTWARE SLOUTIONS

Role: Machine Learning Using Python
4 Weeks - Hybrid

INFOSMITE

Role: UI/UX Designer
2 Weeks - Remote

AI PROJECTS AND DEVELOPMENT

AI-Enabled Gesture Control Virtual Assistant System :

Developed an AI-based virtual assistant capable of interpreting hand gestures as user commands .Integrated computer vision and gesture recognition for touch-free human-computer interaction. Designed the system to perform predefined computer operations based on recognized gestures. Applied concepts related to Computer Vision, AI, image processing, and automation.

Technologies: Python, OpenCV, Computer Vision, AI, Gesture Recognition

SKILLS & COMPETENCIES

Python, C, SQL, Machine Learning, Data Science, Computer Vision, Team Collaboration, Problem Solving, Quick Learning.

AI PROJECTS AND DEVELOPMENT

Voice Assisted Chatbot :

Developed a voice-enabled chatbot for interactive communication through spoken commands. Implemented speech input and automated responses to create a conversational user experience. Applied concepts related to Speech Recognition, Natural Language Processing, and AI. Focused on creating a simple and user-friendly voice interaction system.

Technologies: Python, Speech Recognition, NLP, AI, Chatbot Development

Face Attendance System :

Developed an automated attendance management system using facial recognition technology. Implemented face detection and recognition to identify registered individuals. Automated attendance recording to reduce manual effort and improve efficiency. Applied computer vision techniques to address a practical real-world problem.

Technologies:Python, OpenCV, Face Recognition, Computer Vision

TECHNICAL SKILLS :

Programming: Python, C, SQL

Artificial Intelligence & Machine Learning:

- Machine Learning Fundamentals
- Supervised & Unsupervised Learning
- Classification, Regression
- Model Training & Evaluation

Data Science:

- Data Cleaning
- Data Analysis
- Exploratory Data Analysis
- Data Visualization

Computer Vision:

- OpenCV
- Image Processing
- Face Detection & Recognition
- Gesture Recognition

Database:MySQL, SQL,

Tools: Visual Studio Code, Google Colab, Git & GitHub

:)

Open to learning new technologies and working on real-world AI/ML applications.

Interested in Artificial Intelligence, Machine Learning, Data Science, Computer Vision, and Generative AI.

Comfortable working independently as well as in a team environment.

Interested in entry-level opportunities and internships in AI, ML, Data Science, and Software Development.
